MOUNT KENYA

Enjoy a spectacular flight over Mount Kenya, the highest mountain in Kenya and the second highest in Africa. Have a picnic breakfast on the shores of Lake Michelson and try your hand at trout fishing. This excursion is done in the morning with departure around 7:00am to be on the mountain for an early start. We do not operate this excursion in the afternoon due to weather conditions and July/August can be difficult with cloud cover.

Please note that we only allow 4 pax per helicopter for this Mount Kenya excursion if clients are landing on the mountain. Should it only be a scenic flight over the mountain then we can take 5 pax. This is a strict policy due to safety with landing on the mountain at altitude.

SAMBURU SCENIC SUNDOWNER

A spectacular scenic flight flying North over Samburu National Reserve, famous for its vast elephant herds and the lifeblood of the North the Ewaso Nyiro River. You will then touch down and explore the summit of Ol Loloowe; a giant flat topped massif sacred to the Samburu people. Its summit has a high altitude mist forest with giant cycads and unusual birdlife including Kenya's largest nesting colony of Ruppell's Vultures. You continue your journey on to Naitodo; another iconic granite outcrop, that featured extensively in David Attenborough's 'Africa' series and has 360 degree views over Samburu. Enjoy an early morning coffee or a late afternoon sundowner before returning to camp.

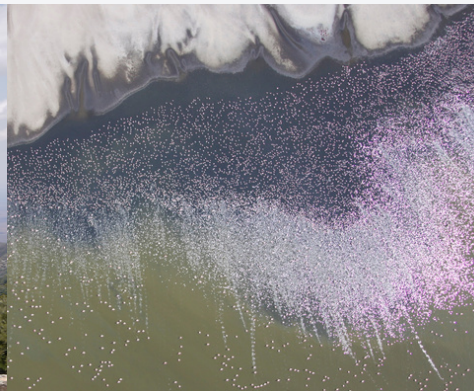

SUGUTA, TURKANA & MATTHEWS

This trip departs at 7:00am; before it gets too hot. The flight takes you up the stunning Suguta, Hoodoo and Painted Valleys across the Suguta Sand Dunes and to the southern tip of Lake Turkana stopping at Nabyutom Crater. It then cuts back down the Ndoto Mountains and Matthews range where you will make a stop to land for a walk in the Cycad forest. An unbelievable flight across Kenya's "Big North" seeing places only accessible by air.

Optional extra to stop for a swim and lunch at Koros Camp.

MATHEWS, RETETI AND OLOLOKWE

Depart at 8am with a picnic breakfast. You will fly north across the Ewaso-Nyiro river cutting between the Ol Lolokwe and Warigus mountains touching down at the Reteti Elephant Sanctuary just before 9am. Here you will view the morning feeding session and learn about the programme. Another short flight lands you on the top of the Mathews Mountains for a walk in the ancient cycad forest and picnic breakfast before returning to camp via another stop on Ol Lolokwe.

LAKES, POKOT AND SILALI CRATER

An early morning departure before it gets too hot. This is a lovely scenic flight over the Rift Valley Lakes including a stop on the edge of Lake Bogoria to see the flamingos and an (optional) stop to visit the Pokot Tribe. The Pokot, in our view, is the second best tribal experience in Kenya. A picnic breakfast will be enjoyed along the way.
